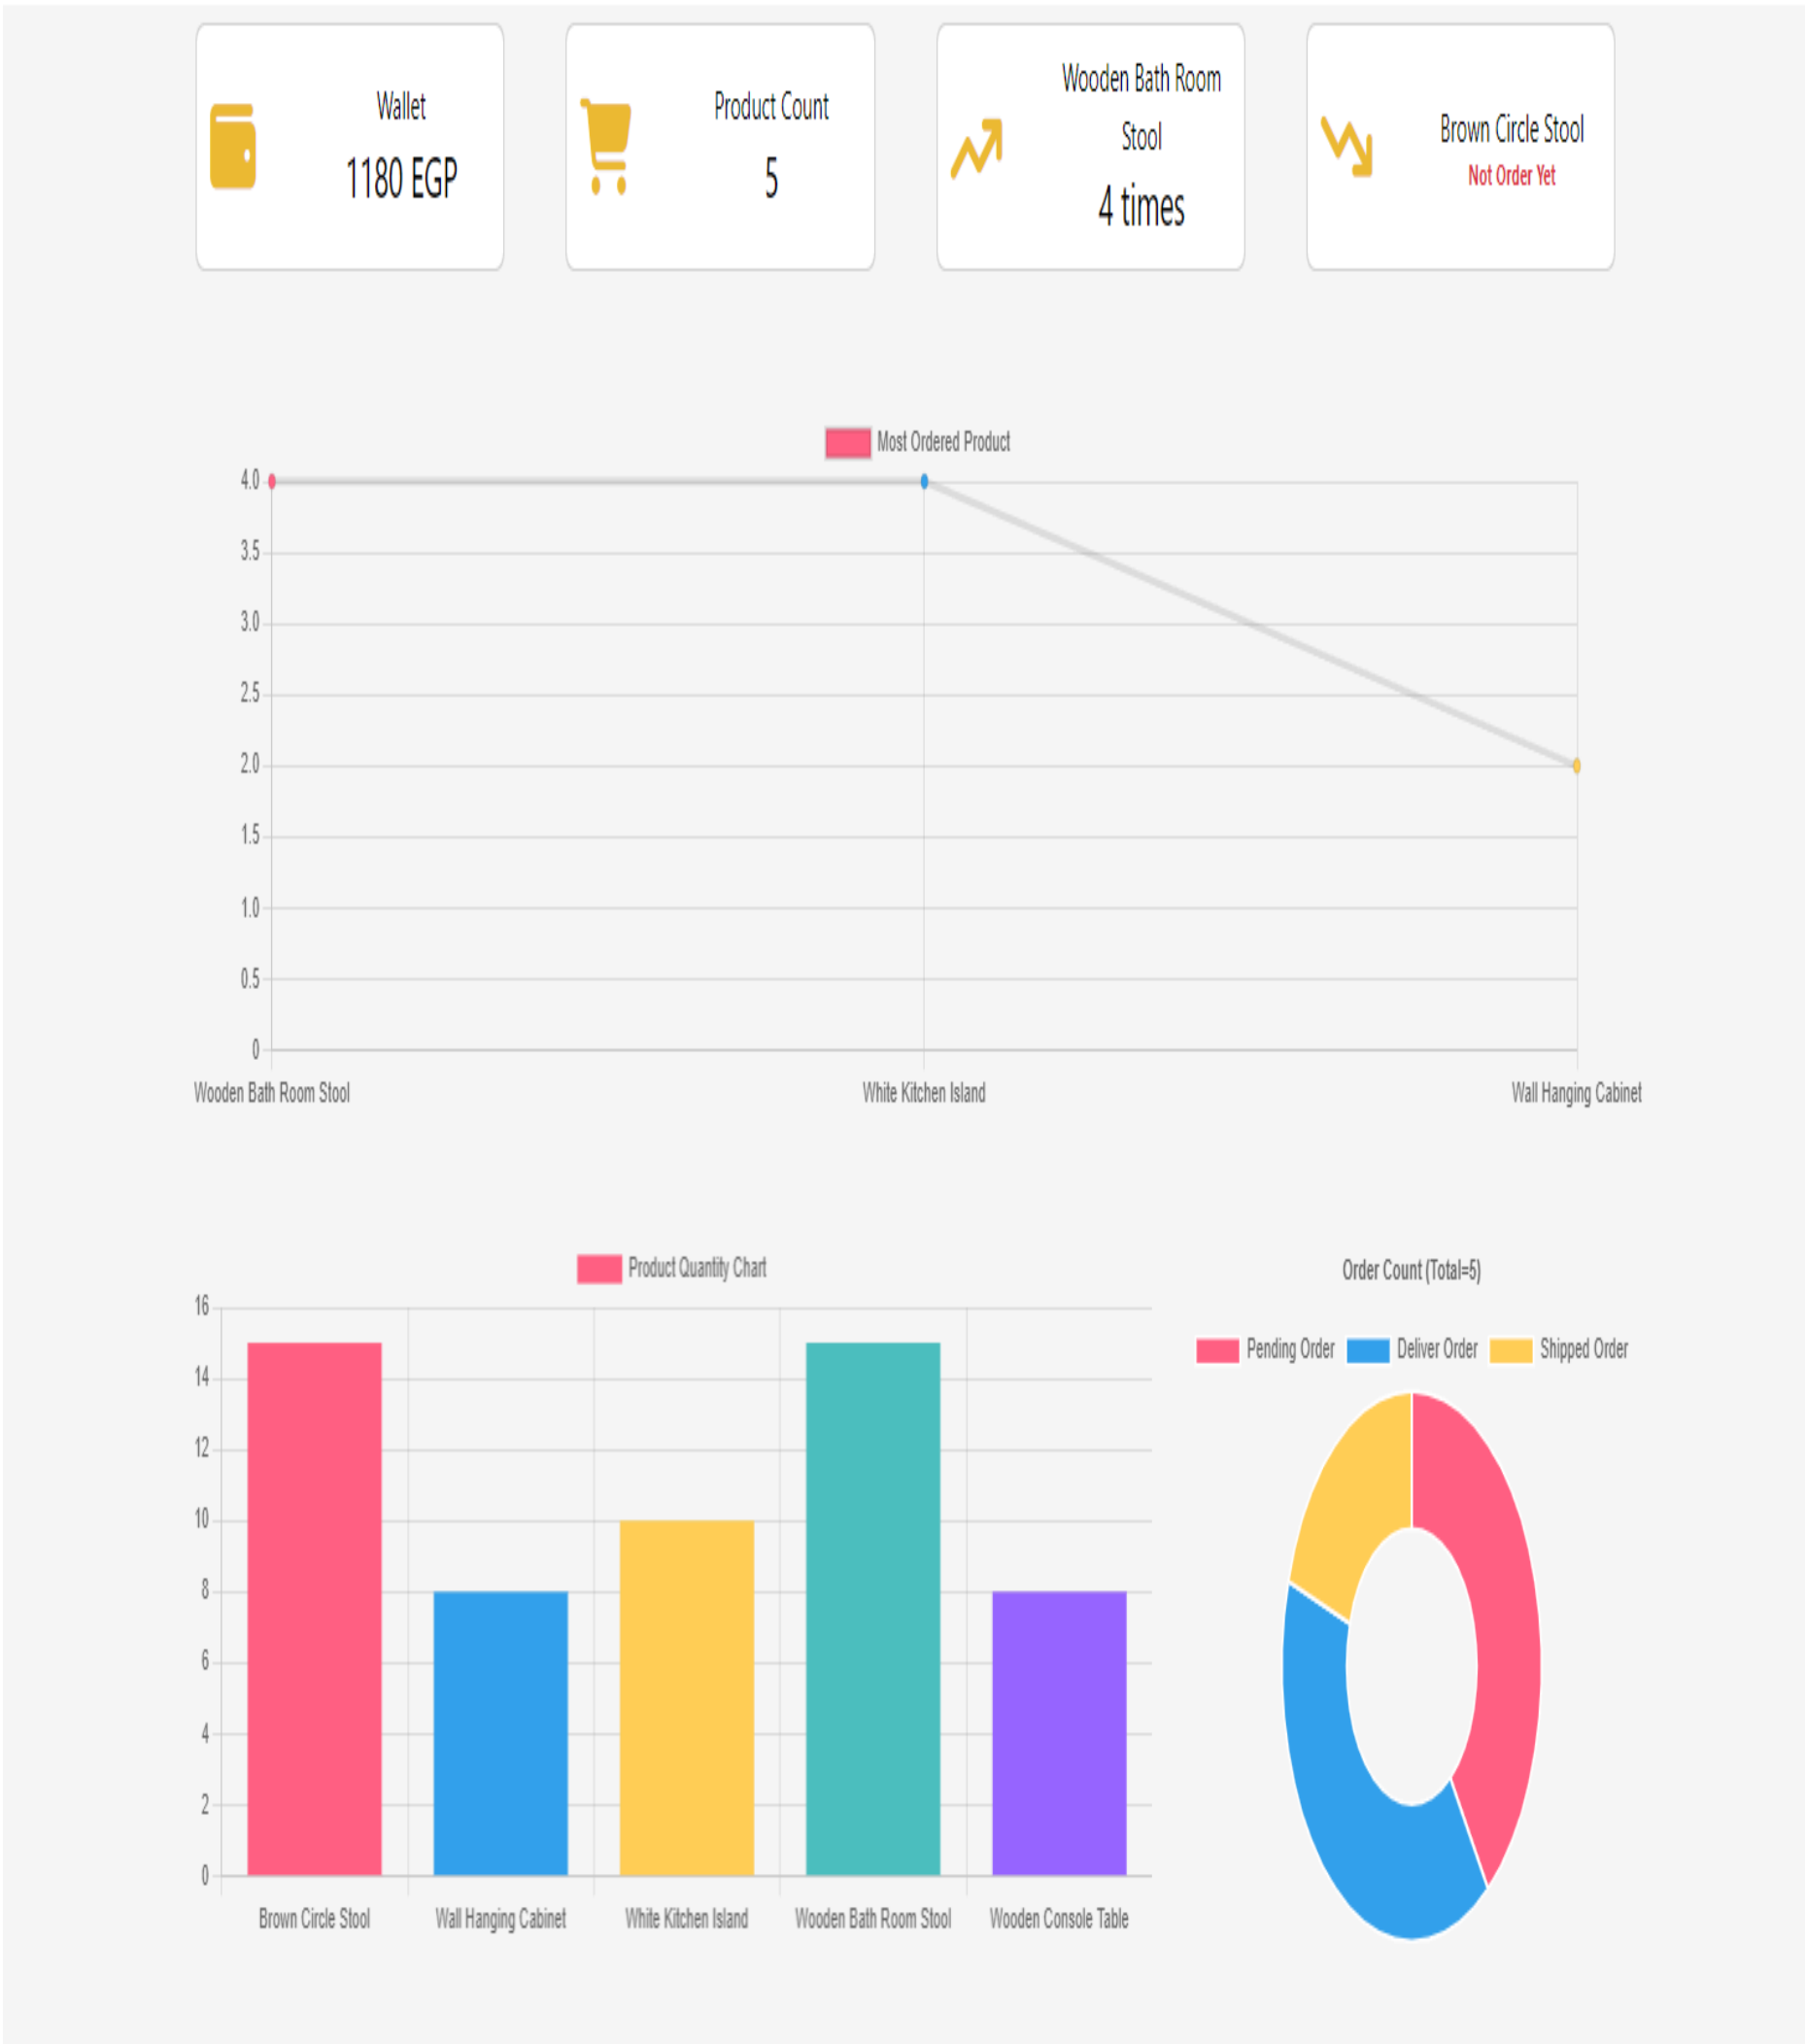
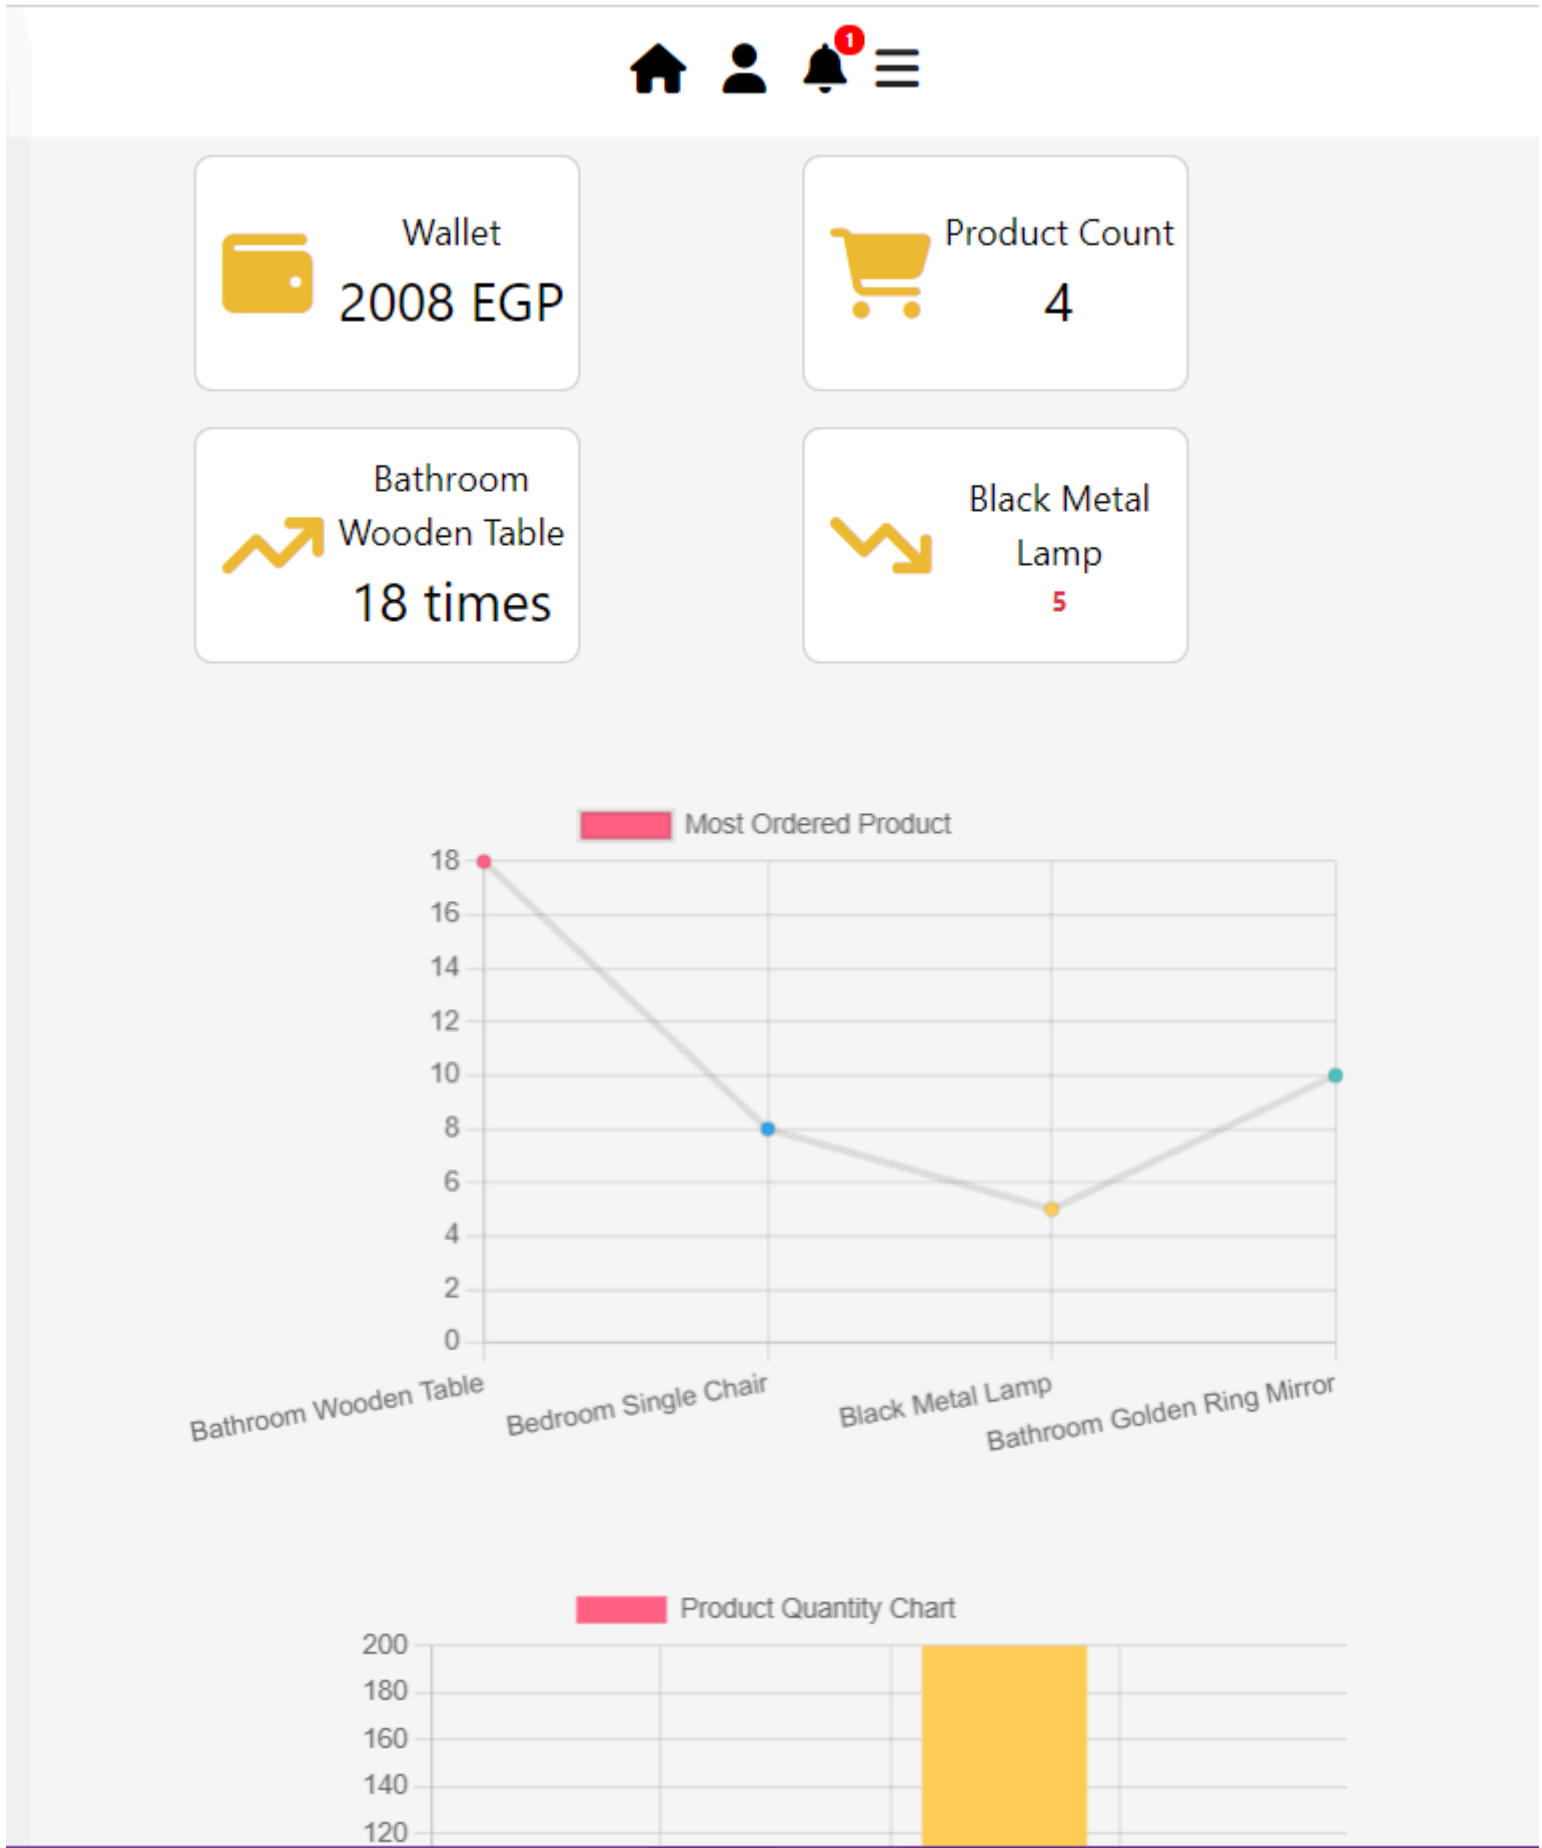
- number for the whole order and number for each (pending/deliver/shipped) order.



Shape of page at small screens

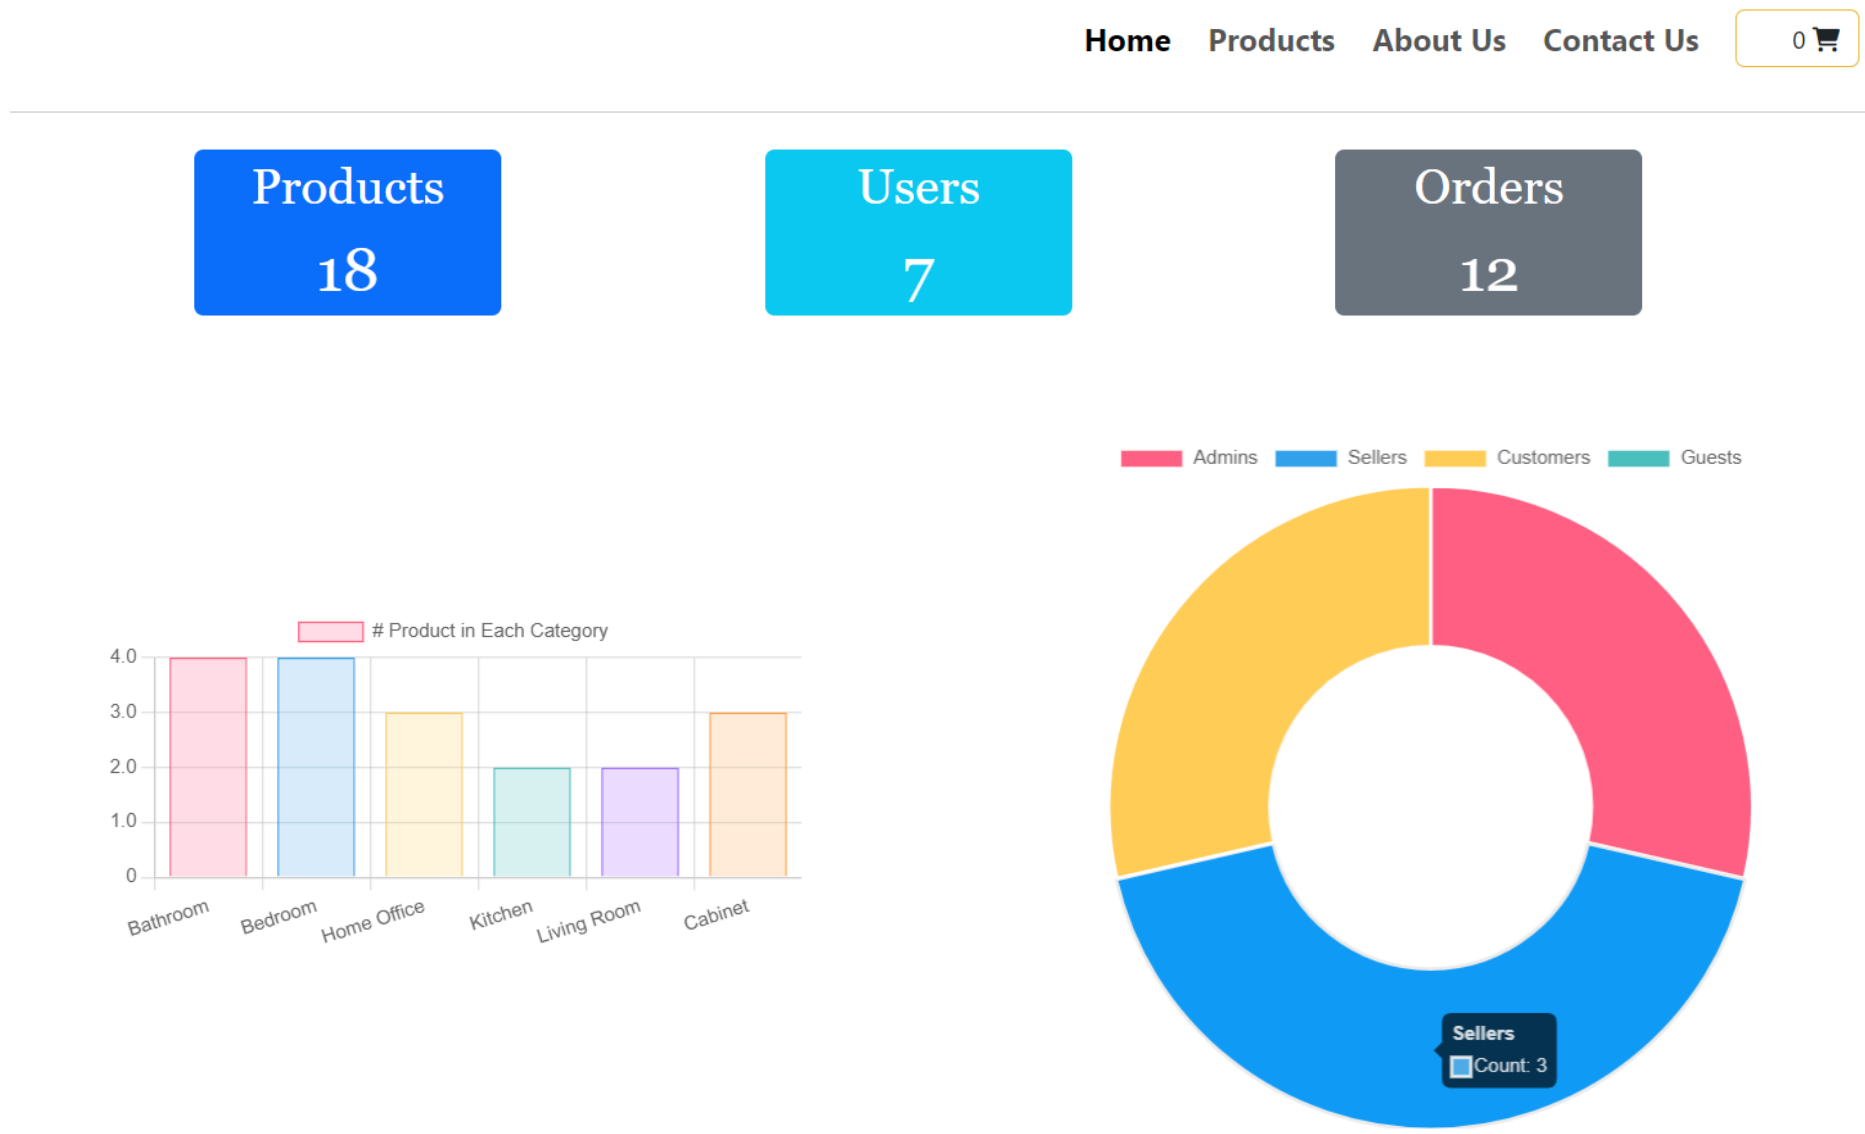


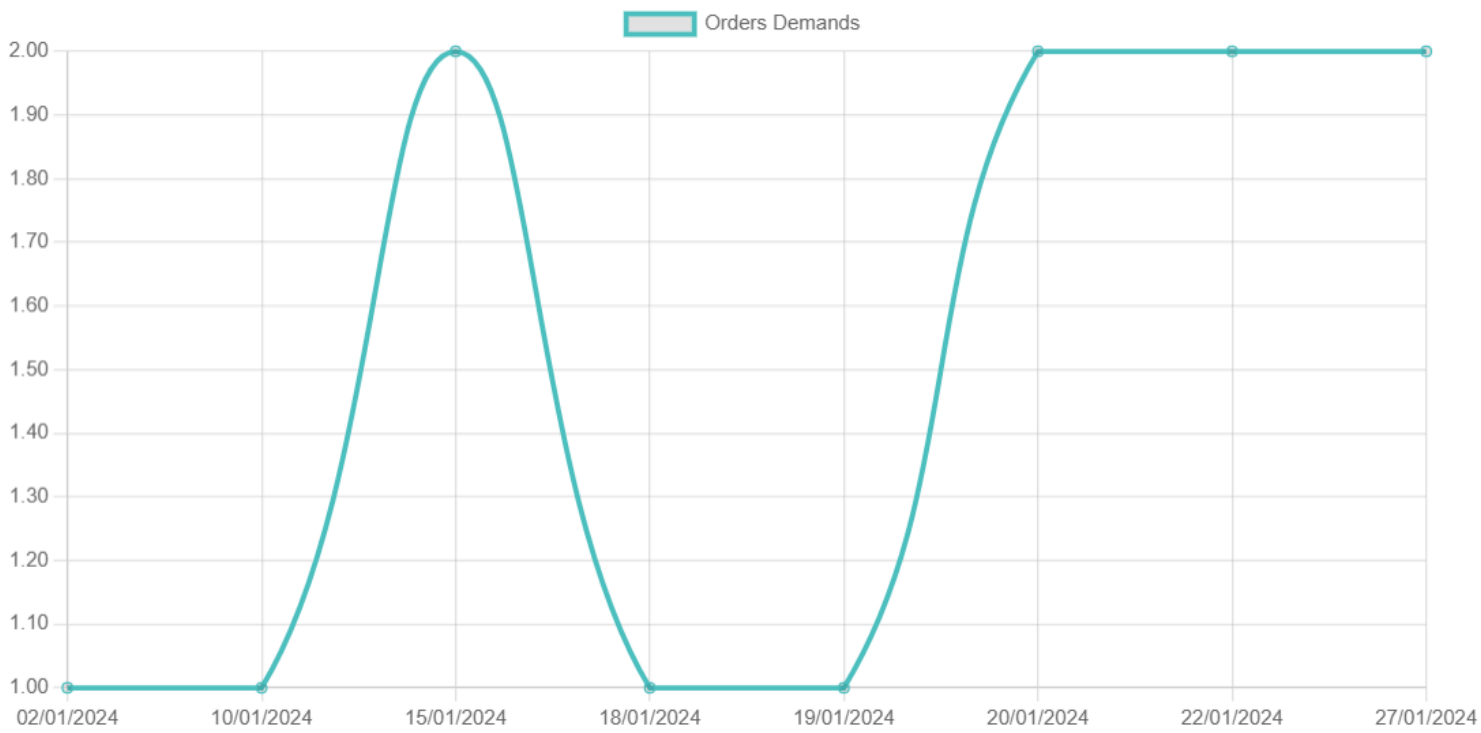
Admin DashBoard

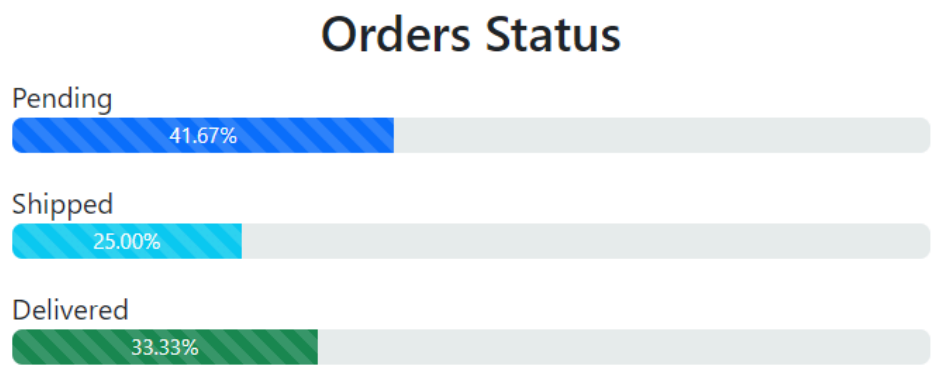
This documentation provides an overview of the Admin Dashboard, designed using HTML,CSS, and JavaScript. The dashboard is a web-based interface that allows administrators to manage and monitor various aspects of a system or application.

Overview:

This page is designed to provide users with a seamless experience in Seeing Analysis of Products, Users and Orders.Charts are a crucial component of an admin dashboard as they provide a visual representation of data, making it easier to understand, analyze, and make decisions. In an admin dashboard, charts are used to display data trends, comparisons, and patterns in an interactive and engaging manner.

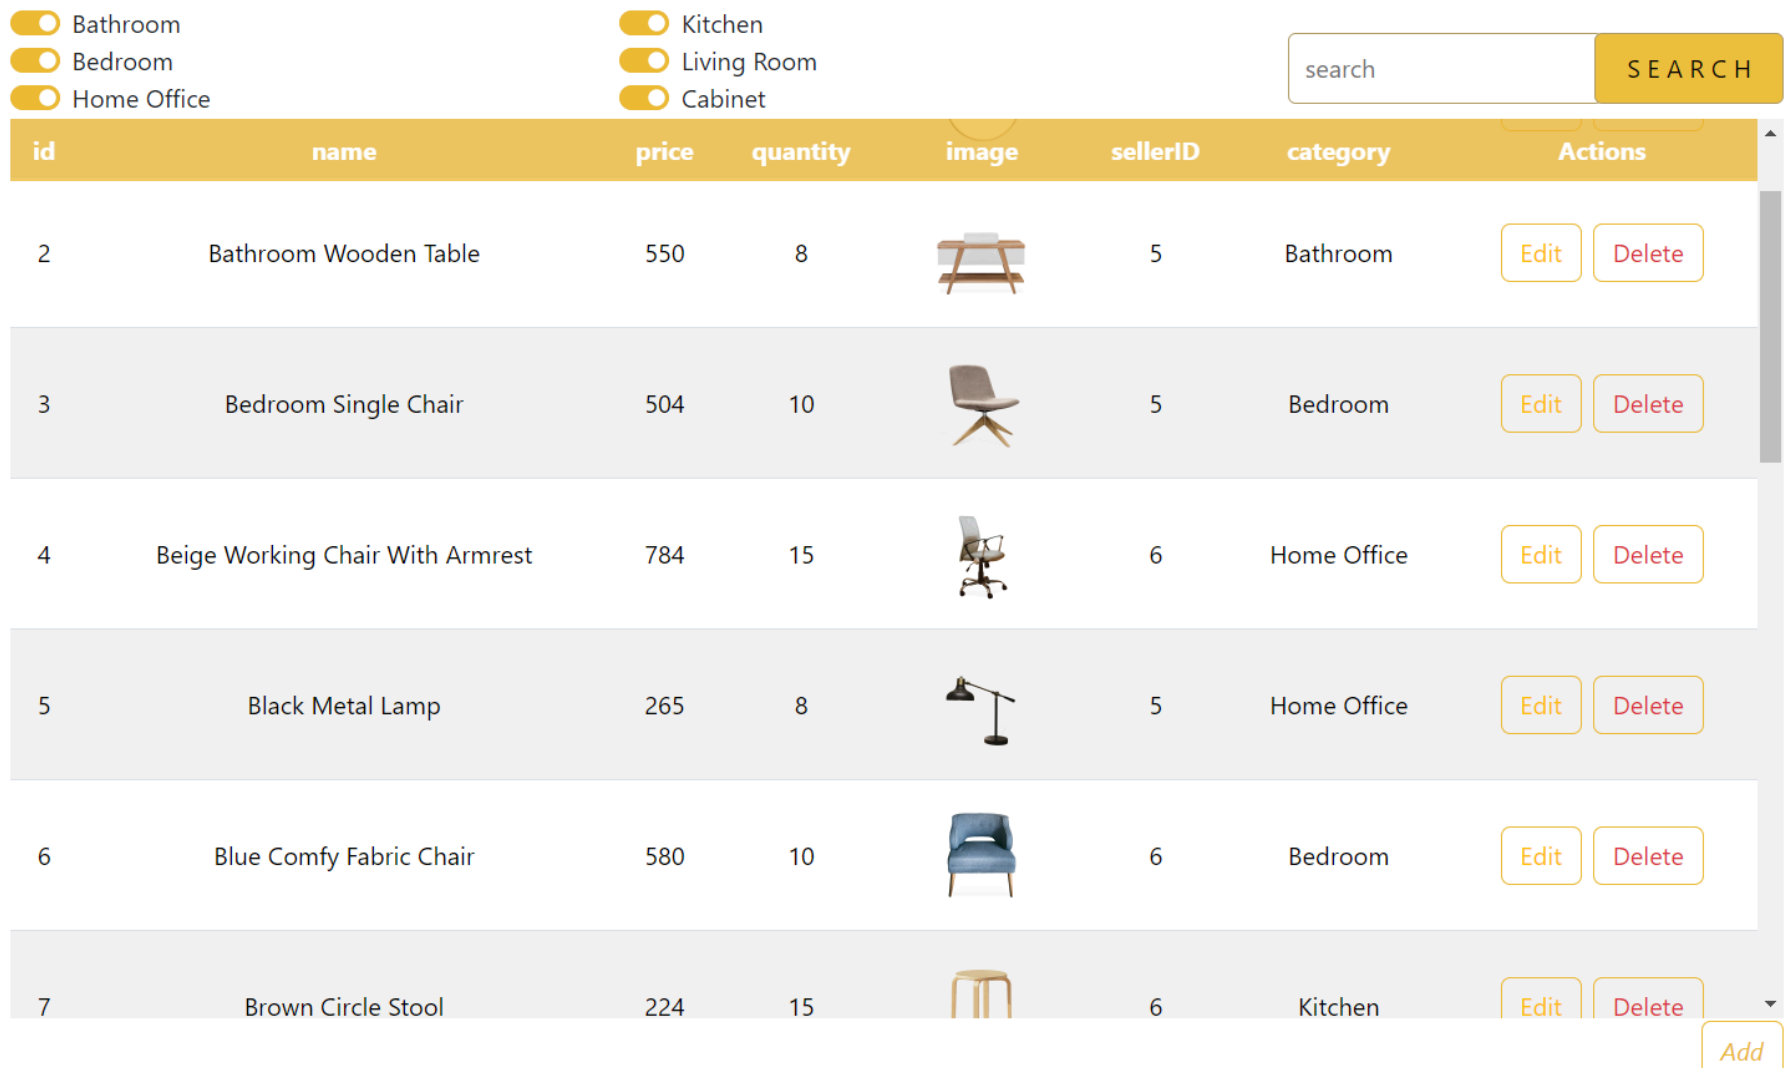






Overview:

This page is designed to provide users with a seamless experience in searching and managing products through a user-friendly interface. It features a prominent search bar for quick product searches and a comprehensive product catalog displayed in a table format,
complete with a delete button for each product.



Page Structure

Search Bar:

- Located at the top of the page for high visibility.
- Users can enter keywords to search for products in the catalog searching in filtered elements.

Filter Bar:

- Located at the top of the page for high visibility.
- Users can choose which category they want to display and search in.

Admin Nav Bar:

- Located at the left of the page for high visibility.
- Admins can use it to navigate through Admin Pages.

Table Columns:

- Product ID: Unique identifier for each product.
- Product Name: Name of the product.
- Product Price: Price of each unit of this product.
- Product quantity: Available stock quantity.
- Image: Main image of Product.
- Seller Id: id of Product Seller.
- Category: Product category.
- Actions: Actions on Products (Edit, Delete).

Delete Button:

- Located in the 'Actions' column of the table.
- Allows Admins to remove products from the catalog.
- Clicking the button will prompt a confirmation dialog to prevent accidental deletions.

Edit Button:

- Allows Admins to Edit products from the catalog.
- Clicking the button will prompt a modal that has existing value for that specific product.

Functionality:

Search Functionality

- The search bar filters the product catalog based on the user's query.
- Results update in real-time as the user types.
- The search search in all shown fields and if results are filtered it will search in filtered data.

Product Catalog Management

- The product catalog is dynamically populated from a database or data source.
- Administrators can easily view and manage the list of products.

Deleting Products

- The delete button initiates a removal process for the selected product.
- A confirmation dialog appears to ensure the action is intentional.
- Upon confirmation, the product is removed from the catalog and the database.

Design Considerations

- Responsive design to ensure compatibility with various devices.
- Intuitive layout and easy navigation.
- Minimalistic design with a focus on functionality and usability.
- Accessibility features for all users, including keyboard navigation and screen reader compatibility.

Technologies Used

- HTML for page structure.
- CSS for styling and responsive design.
- JavaScript for interactive elements like the search functionality and delete actions.
- Bootstrap platform for making component and responsive design.

Security and Data Integrity

- Confirmation dialogs to prevent accidental deletions.

- Can’t delete products that are in orders.
- Can’t display Page if not Admin.
